

FOR IMMEDIATE RELEASE

Amazing success at IDS 2013!

BERNECK, Switzerland, 19th March 2013 --- Biodenta Group is pleased to report the successful launch of its new **Total Solution Provider** concept, which was presented during IDS 2013 to a very interested audience.

On our booth in Cologne we shared the latest BIODENTA technologies with our customers from all over the world. We were overwhelmed by the number of visitors: more than 150 dentists and dental technicians from all over the globe were interested in learning more about both products and services provided by BIODENTA.

Within our Biodenta Dental Implant System (DIS), the new Tapered Implant line and an extension of our Bone Level Implants and Abutment range were demonstrated on our booth.

Biodenta Tapered Implant

Tapered Implant with housing

Surgical Kit for Tapered Implants

Biodenta Multi Use Abutments for Tapered Line

Under the trademark of DentaSwiss we presented our Digital Dentistry System complete with our full DentaSwiss CAD/CAM library for 3Shape solutions. This includes scan bodies, digital model analogs and hybrid abutments.

TRIOS® POD solution

TRIOS® Intraoral scanner

About Biodenta:

Biodenta is a Swiss company, located in Berneck, Switzerland. We are active in the global market of dental rehabilitation solutions, for dentists and dental technicians. Biodenta has defined its entry into the dental industry on the concept of the "Total Solution Provider", being a system based approach to dentistry. Our two main modules are: **Dental Implant System (DIS)** and **Digital Dentistry System (DDS)**. DIS products and services are marketed under the "Biodenta" and DDS products and services under the "DentaSwiss" trademark.
